

HOW-TO

Stop Using AI. Start Running Your Business On It.

The gap between casual AI use and real infrastructure.

4 key insights inside →

01

What Most People Do

Ask AI a question. Copy the answer. Paste it into a doc. Repeat tomorrow.

That's not a system. That's a conversation with a robot. And it's why most entrepreneurs say 'AI didn't really save me time.'

02

What Infrastructure Looks Like

Monday morning. You open your laptop.

Your emails are already sorted by priority. Your meetings are summarized with context. Five pieces of content are drafted from today's headlines.

You haven't done anything yet.

03

How Claude Skills Work

A skill is an automated workflow that Claude runs on repeat — without you lifting a finger.

You configure it once: what to do, how to do it, what your standards are. Then it runs every day, every week, or on demand.

04

Real Examples Running Right Now

- One skill drafts client replies in my voice
- Another turns one newsletter into 12+ social posts
- Another plans content calendars from a single topic

You set up the workflows once. Claude runs them on repeat.

WANT THIS FOR YOUR BUSINESS?

Stop doing admin. Start building *systems*.
