

HOW-TO

Your AI Sounds Like Everyone Else's. Here's How to Fix It.

Out of the box, AI is generic. Here's how to make it yours.

4 key insights inside →

01

The Problem

Out of the box, ChatGPT and Claude are trained to be pleasant, neutral, and slightly generic.

Fine for a Google search. Not fine when you're writing proposals, client emails, or content that needs to sound like YOU.

02

Teach AI Your Voice

Your tone. Your preferences. The way you phrase things. The standards you hold yourself to.

Set it once in Claude — it remembers forever. Every output stops sounding like a stranger wrote it and starts sounding like you on a good day.

03

Kill the Copy-Paste Tax

Most people's AI workflow:

Copy from Google Docs → Paste into Claude → Copy the answer → Paste back into Docs

YOU are the bottleneck. And it's where most of the time savings leak away.

04

Connect AI to Your Tools

When Claude has direct access to Google Drive, your CRM, and your inbox — the copy-paste tax disappears.

That's the difference between 'I use AI sometimes' and 'AI fits how I work.' It takes 30 minutes to set up.
